2.0-5.9: (1 - Little Bighorn - First-up), (2 - Lofty Arch - First-up), (4 - The Rock Dancer - First-up), (6 - Ahha Ahha - Top rated Wexpk)
10-19.9: (6 - Ahha Ahha - Top rated Wexpk)

Explanation of the Wizard Magic (TOP) Report (Trainer Out-Perform)

A key factor in the success of a racehorse is without doubt the ability of the horse's trainer. For example, some trainers out-perform with first-up runners, or when backing-up quickly, whilst others have an excellent record when their horses are rated to win.

The Wizard Magic Report focuses specifically on these trainer specialities.

There is a second important element in this Magic report, the monitoring of early market moves and wagering operator's book rebalancing in the light of early betting and information received.

Taken together, these two factors, trainer specialities and early market moves, provide a unique insight into the possible outcome of a race.

Tab: Racebook, Tab number.

Horse Name: Name of the runner.

Jockey: The name of the jockey engaged to ride the horse; apprentice claim; an asterisk (*) indicates a past winning jockey on the horse replacing a non-winning jockey.

Trainer: The name of the trainer or training partnership.

2.0-5.9 Tr/Jk: The number of winners and the strike rate for this Trainer/Jockey combination in the $2.00 to $5.90 odds range over the last 12 months.

6.0-9.9 Tr/Jk: The number of winners and the strike rate for this Trainer/Jockey combination in the $6.00 to $9.90 odds range over the last 12 months.

2.0-5.9 MAGIC: The number of profitable years (from the past 6 years) based on starting price odds, the win strike rate over the full period, and the positive return over the full period, and one or two asterisks indicate that firming in the market was a determinant.

Example: 3 39% 1.30: In 3 of the six years the Trainer Out-Performed (TOP) and was flat-stakes profitable, the overall win strike rate was 39%, and the level stakes return at starting price was $1.30, or 30% profit on investment.

Example: 5 36% 1.25*: In 5 of the six years the Trainer Out-Performed (TOP) and was flat-stakes profitable, the overall win strike rate was 36%, and the level stakes return at starting price was $1.25, or 25% profit on investment, and the runner needed to firm in the betting from the opening raceday odds to the point 5 minutes before the start of the race.

Example: 4 37% $1.33**: *: In 4 of the six years the Trainer Out-Performed (TOP) and was flat-stakes profitable, the overall win strike rate was 37%, and the level stakes return at starting price was $1.33, or 33% profit on investment, and the runner needed to firm in the betting from approximately 30 minutes before race start time to the point 5 minutes before the start of the race.

6.0-9.9 MAGIC: The number of profitable years (from the past 6 years) based on starting price odds, the win strike rate over the full period, and the positive return over the full period, and one or two asterisks indicate that firming in the market was a determining factor.

10-19.9 MAGIC: The number of profitable years (from the past 6 years) based on starting price odds, the win strike rate over the full period, and the positive return over the full period, and one or two asterisks indicate that firming in the market was a determining factor.

Eodds PM: Early pre-post market based on an average of odds offered by wagering operators, this market is adjusted to 120%.

EOdds AM: An early-morning (2-3 edition) or mid-morning (3-3 edition) market based on an average of odds offered by wagering operators on race morning, this market is also adjusted to 120%. As there are two editions of MAGIC produced on race morning, we average two sets of available odds and show the percentage change from Eodds Eve twice.

Odds %Chg1: This figure shows by how many percent a runners odds have firmed when comparing the early-morning odds to Eodds Eve. Only when odds firm by 3% or more are they reported, as lower positives and all negative have been found to have less predictive value.

Odds %Chg2: This figure shows by how many percent a runners odds have firmed when comparing the mid-morning odds to Eodds Eve. Only when odds firm by 3% or more are they reported, as lower positives and all negative have been found to have less predictive value.

Rating WMHE: Indicates where the runner is rated in the W (Wrat), M (Wmod), H (Whcp), or E (Wexpk) rating options. Horses which are rated 3rd or better in at least one option are included in this column.

Cycle RFS: Number of runs since a spell.

Examples: 3 Px1o = 3rd run from spell, o placed (2nd or 3rd) third up last prep, 1st when 3rd up two preps back, x   unplaced when third up three preps back.

Examples: 1 Fox1 = having first run from spell, 1st when first-up last prep, x unplaced when first-up up two preps back, o placed (2nd or 3rd) when first-up three preps back.

Switch: An indication that the runner is switching from a distance range (D) over which it has not won to a distance range over which it has been successful, from a racetrack (T) over which it has not won to a track over which it has won, from a non-winning age group (A) to an age group against which it has been successful, and from a track surface (S) on which it has not won to a surface on which it has won.

Tr/Jk Fil Neg: WJkTr: (T) indicates an out-performing trainer/jockey combination; (F) where key positives significantly outweigh negatives facing the runner; (N) no negative factor facing the runner.

Dist: number of career wins at the distance +/- 10% and the win strike rate at this distance range.
